Figure 1 consists of two schematic diagrams, (a) and (b), illustrating the experimental setup. Diagram (a) shows a subject sitting at a table, looking at a screen. A video camera is positioned above the screen. A target is displayed on the screen. Diagram (b) shows a subject sitting at a table, looking at a screen. A video camera is positioned above the screen. A ruler and a target marker are also shown on the table.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the control group. The experimental group was divided into two subgroups: the experimental group and the experimental group.

The figure consists of two separate line graphs, labeled (a) and (b). Both graphs plot 'Rate of reaction' on the y-axis against 'Temperature' on the x-axis. Graph (a) shows a curve that starts at a low rate at low temperatures and rises very steeply as temperature increases, indicating a high activation energy. Graph (b) shows a similar curve, but the rise is much more gradual and occurs over a wider temperature range, indicating a lower activation energy.

[illegible]

14. The following table shows the number of people who attended the first 10 games of the 2008-2009 season at the home arena of the New York Yankees. The number of people who attended the 11th game is missing. Find the value of x if the mean number of people who attended the 10 games is 35,000.

Game	Number of people
1	32,000
2	34,000
3	36,000
4	38,000
5	40,000
6	42,000
7	44,000
8	46,000
9	48,000
10	49,000
11	x
