CLEARWATER, FL 33756

SUBJECT: ALPHA-BATES  
Ref. Number: W07000022019

We have received your document for ALPHA-BATES and your check(s) totaling \$87.50. However, the enclosed document has not been filed and is being returned for the following correction(s):

Class(es) (9) would appear applicable to your specific mark. Please delete the class(es) you have on line 2 (d) and insert the pertinent class(es) (9).

Although we received your application and check(s), no specimens were included. Section 495.031(5), F.S., requires every trademark and/or service mark application to be accompanied by three specimens (or examples). Please submit three specimens for each class of registration. (NOTE: Letterhead, stationery, envelopes, invoices and mailing labels are not accepted.)

We need three permanent specimens, **which may be the same or different**. TYPED or HANDWRITTEN MATERIALS ARE NOT ACCEPTABLE. We do not accept specimens which have been ALTERED or DEFACED. ANY SIZE SPECIMENS ARE ACCEPTABLE. If your mark falls under the classification of a trademark (classes 1-34), we need the labels, tags, decals, containers, boxes, wrappers or 3 LEGIBLE photographs of the goods or products with the specimen affixed. IF YOUR MARK FALLS UNDER THE CLASSIFICATION OF A SERVICE MARK (CLASSES 35-42), WE NEED SPECIMENS FROM WHICH WE CAN DETERMINE THE SERVICE(S) BEING RENDERED. We will accept magazine and-or newspaper advertisements, brochures or business cards. If business cards are submitted, we must be able to determine the services being rendered. If your mark falls under the classification of both a trade and service mark, we need specimens for both. **WE WILL NOT ACCEPT LETTERHEAD STATIONERY, ENVELOPES OR INVOICES AS SPECIMENS.**

Pursuant to s. 495.035(5), F.S., this application will be considered abandoned if the applicant fails to reply or resubmit the corrected/amended application within three months from date of this letter.

If you have any questions concerning the filing of your document, please call (850) 245-6918.

Interpreter Help

Postscript printing consists essentially of token scanning, and a simple interpreter. The scanner is complex because it must be able to suspend its operation at any time (i.e., between any two input characters) to allow an interpreter call. If it is not returning from a procedure-based stream and the procedure must be called to provide more input data.
