Secretary of State

January 6, 1999

WILLIAM S. GALVANO, ESQUIRE
GRIMES, GOEBEL, ET AL.
1023 MANATEE AVE. WEST
BRADENTON, FL 34205

SUBJECT: REJUVEN
Ref. Number: W99000000320

We have received your document for REJUVEN and your check(s) totaling \$175.00. However, the enclosed document has not been filed and is being returned for the following correction(s):

In Part III, you must write the exact wording of the mark. If the mark includes a logo or design, a brief written description must be provided.

The specimens provided this office are not acceptable; we need three permanent specimens, which may be the same or different. We do not accept photocopies or camera ready copies. We do not accept specimens which have been altered or defaced in any manner. In order to register your service mark, we need specimens from which we can determine the services being rendered. We will accept brochures, newspaper, or magazine advertisements, or business cards. If business cards are used, we must be able to determine from the business card the services offered. The mere mark, address, city, etc., on the business card, brochure, or advertisement is not acceptable -- we must be able to look at the specimens provided and be able to determine the services being rendered. We need specimens for each class of registration.

Please return your document, along with a copy of this letter, within 60 days or your filing will be considered abandoned.

If you have any questions concerning the filing of your document, please call (850) 487-6918.

Nanette Causseaux
Corporate Specialist Supervisor

We have received your document for REJUVEN and your check(s) totaling \$175.00. However, the enclosed document has not been filed and is being returned for the following correction(s):

You failed to make the correction(s) requested in our previous letter.

If this is both a trade and a service mark you should be registered in classes 35 and 16. Please correct you application in Part I 2(b) to statethe identification of a newsletter. We still need specimens for class 35, we will accept business cards, brochures, or newspaper adds, it must be something from which we can determine the services being rendered. Please make the corrections on your original application, not the fax copy you submitted. We must have original signatures with the original notary.

The specimens provided this office are not acceptable; we need three permanent specimens, which may be the same or different. We do not accept photocopies or camera ready copies. We do not accept specimens which have been altered or defaced in any manner. In order to register your service mark, we need specimens from which we can determine the services being rendered. Florida Department of State
P.O. Box 6327
Tallahassee, Florida 32314

Dear Ms. Causseaux:

I appreciate our conversation of today and your assistance as we seek registration of service marks and trademarks for the name *Rejuven*.

As per your recommendations, I am submitting the amended application to include the request for registration of the *Rejuven*TM for the use of class 16, which would take care of the newsletter as a separate class.

I have enclosed samples of the utilization of the service mark, the trademark as well as the newsletter.

If you need further information, please contact my office directly.

Sincerely,

Enrique J. Fernandez, MD, FACS

LASER FACIAL REJUVENATION

by Enrique J. Fernandez, MD, FACS

The aged facial appearance is the visible result of a combination of changes on the surface of the skin as well as beneath it. Sagging skin and the resulting altered contours of the face and neck contribute significantly. However, a major contributing factor to this condition is the appearance of the *surface* of the skin. Severely sun damaged skin is a major reason why some people appear to have significantly aged prematurely without having major sagging of their skin. While facelifts, eyelid surgery and other procedures have for decades been the usual treatments for facial rejuvenation, only in the past few years has the use of the Ultrapulse carbon dioxide laser become available for treating the skin itself in a way that significantly improves its condition and appearance.

The Use of Chemical Peels

For many years, various chemical peels allowed the treatment of various skin conditions by applying them to different depths of the skin. They typically do not penetrate the skin as deeply as the laser can. They are thus successfully used for more superficial skin problems such as milder forms of sun damage and discolorations. They help keep the skin healthy and smooth. While chemical peels will continue to play a useful role, the Ultrapulse laser has greater use in large part due to

its greater effectiveness and safety when treating more pronounced conditions.

What is New About the Ultrapulse Laser?

We have been using various lasers over the past twelve years as they have been developed for the treatment of a variety of skin conditions. The Coherent Ultrapulse 5000C laser represents a major advance in laser technology by providing pulses of energy of extremely short duration. This characteristic greatly diminishes unwanted side effects and enhances the effectiveness of the laser treatment.

LONGBOAT KEY OFFICE

Our newest office is located at the Centre Shops on Longboat Key and has been an exciting addition to our practice. It is now in its third year of operation. It is open for consultation by appointment as well as ongoing skin care services provided by our medical and nursing staff.

CONTEMPORARY NEWS

Cosmetic Surgery is on the Rise

The American Society of Plastic and Reconstructive Surgeons reports that all cosmetic procedures surveyed in 1997 have increased in number by at least 50 % over the last five years. The ASPRS study provides statistics on the procedures performed by its member surgeons who are certified by the American Board of Plastic Surgery, like Dr. Fernandez.

Of the various procedures reported, breast augmentation led the way with a 275 % increase since 1992. Nearly 150,000 people had liposuction in 1997, which accounts for a 215 % increase. Eyelid surgery increased 86 %, while facelifts went up by 52 %.

The best candidates for liposuction are healthy men or women that

HOW MANY OBAGI BLUE PEELS CAN BE DONE?

Your doctor will determine how many peels are necessary to achieve the desired result. In most cases the procedure takes 25-30 minutes.

WHAT CAN I EXPECT?

Depending upon the condition of your skin, 1-4 coats of the Obagi BLUE PEEL solution will be applied. Most people will not require sedation. If the doctor indicates sedation, you will need someone to drive you home.

At each level, you will experience a mild burning sensation that lasts 2 to 3 minutes. The doctor may use an electric fan to minimize this sensation. A bluish tint remains on your skin: it will usually wash off in 12 to 24 hours. Your skin will begin to peel within 2 to 3 days and should be healed in an average of 7 to 10 days. This peeling should not disrupt your regular lifestyle.

CAN THE OBAGI BLUE PEEL PROCEDURE BE USED TO TREAT OTHER PARTS OF THE BODY?

Yes. The Obagi BLUE PEEL can be performed on the neck, chest, hands, back, arms and legs using the same technique as for the face. Discuss the benefits and process with your physician.

CAN I DO THE OBAGI BLUE PEEL PROCEDURE MYSELF?

No, the Obagi BLUE PEEL is a medical procedure and **MUST** be performed by a physician or a properly trained specialist working under his/her supervision.
