11. The purpose of the present study is to investigate the effects of the two conditions on the subjects' perceived exertion, heart rate, and oxygen consumption. The subjects were divided into two groups: the control group and the experimental group. The control group was subjected to the standard condition, while the experimental group was subjected to the modified condition. The results of the study are presented in the following table.

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$
