11. $\frac{1}{2} \frac{d}{dt} \left(\frac{1}{2} \frac{1}{\mu} \frac{d\mu}{dt} \right) = \frac{1}{2} \frac{1}{\mu} \frac{d\mu}{dt} \frac{d\mu}{dt} = \frac{1}{2} \frac{1}{\mu} \left(\frac{d\mu}{dt} \right)^2$. This is a separable differential equation. The general solution is $\mu(t) = \sqrt{2t + C}$. The initial condition $\mu(0) = 1$ gives $C = 1$. Thus $\mu(t) = \sqrt{2t + 1}$. The speed of the particle is $v(t) = \frac{d\mu}{dt} = \frac{1}{\sqrt{2t + 1}}$. The speed of the particle is $\frac{1}{\sqrt{2t + 1}}$ at time t .
