11. *Chlorophyll *a** and *Chlorophyll *b** were determined in the acetone extract of the leaves by the method of Arar and Johnson (1977). The concentration of the pigments was determined by measuring the optical density of the extract at 663 nm and 646 nm. The concentration of the pigments was calculated using the following equations:

13.	Actual	Estimate	Ratio	Deviation
V/D			X	
VSD			X	
VD			X	
VT			X
