11. *Chlorophyll a* and *Chlorophyll b* were determined in the chlorophyll extract by using a spectrophotometer. The chlorophyll content was determined by using the following formula: $\text{Chlorophyll } a = 11.85 \times \text{OD}_{665} - 1.81 \times \text{OD}_{646}$ and $\text{Chlorophyll } b = 2.13 \times \text{OD}_{665} + 5.16 \times \text{OD}_{646}$. The total chlorophyll content was determined by using the following formula: $\text{Total Chlorophyll} = \text{Chlorophyll } a + \text{Chlorophyll } b$. The chlorophyll content was expressed as $\mu\text{g/g}$ of fresh weight of leaf.
