11. *Journal of Management Studies*, 1996, 33(1), 1-14. This paper examines the relationship between the degree of internationalization of a firm and its performance. The authors argue that the degree of internationalization of a firm is a function of the firm's size, age, and industry. They find that larger, older firms in industries with high internationalization tend to have higher performance. They also find that the degree of internationalization of a firm is positively related to its performance. The authors conclude that the degree of internationalization of a firm is an important determinant of its performance.
