Enter Florida street address

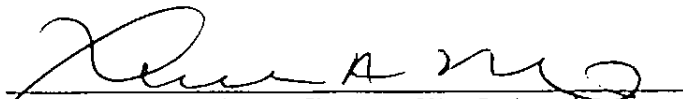

CORAL SPRINGS, Florida 33065

City

Zip Code

New Registered Agent's Signature, if changing Registered Agent:

I hereby accept the appointment as registered agent and agree to act in this capacity. I further agree to comply with the provisions of all statutes relative to the proper and complete performance of my duties, and I am familiar with and accept the obligations of my position as registered agent as provided for in Chapter 605, F.S. Or, if this document is being filed to merely reflect a change in the registered office address, I hereby confirm that the limited liability company has been notified in writing of this change.

If Changing Registered Agent, Signature of New Registered Agent

MGR = Manager
AMBR = Authorized Member

[illegible]

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the preferences and behaviors of potential customers. Once a need is identified, the next step is to develop a concept that addresses this need. This concept should be innovative and differentiated from existing products in the market.

2. After developing a concept, the next step is to create a prototype. This allows the company to test the feasibility of the product and gather feedback from potential users. The prototype should be functional and represent the key features of the final product. Based on the feedback received, the company can make necessary adjustments to the design and functionality.

3. Once the prototype is refined, the next step is to conduct a small-scale pilot test. This involves producing a limited quantity of the product and distributing it to a select group of customers. The purpose of the pilot test is to evaluate the product's performance in a real-world setting and gather valuable feedback from actual users. This feedback can be used to make further improvements to the product.

4. After the pilot test, the company can proceed to a full-scale launch. This involves producing a larger quantity of the product and distributing it to a wider market. The company should implement a marketing strategy to create awareness and generate interest in the new product. This may include advertising, public relations, and sales efforts. The company should also monitor the product's performance and customer feedback closely to ensure a successful launch.

5. Finally, the company should continue to monitor the product's performance and customer feedback over time. This allows the company to identify any issues or areas for improvement and make necessary adjustments. The product lifecycle is an ongoing process, and the company should be prepared to iterate and improve the product based on customer needs and market trends.

(If an effective date is listed, the date must be specific and cannot be prior to date of filing or more than 90 days after filing.) Pursuant to 605.0207 (3)(b)

If the record specifies a delayed effective date, but not an effective time, at 12:01 a.m. on the earlier of: (b) The 90th day after the record is filed.
