Name of New Registered Agent:

New Registered Office Address:

Enter Florida street address

Florida

City

Zip Code

New Registered Agent's Signature, if changing Registered Agent:

I hereby accept the appointment as registered agent and agree to act in this capacity. I further agree to comply with the provisions of all statutes relative to the proper and complete performance of my duties, and I am familiar with and accept the obligations of my position as registered agent as provided for in Chapter 605, F.S. Or, if this document is being filed to merely reflect a change in the registered office address, I hereby confirm that the limited liability company has been notified in writing of this change.

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the preferences and behaviors of potential customers. Once a need is identified, the next step is to develop a concept that addresses this need. This concept should be innovative and differentiated from existing products in the market.

2. After developing a concept, the next step is to create a prototype. This allows the development team to visualize the product and test its functionality. The prototype is typically a simplified version of the final product, but it provides valuable insights into the design and user experience. Based on the feedback from the prototype, the team can make necessary adjustments and improvements.

3. Once the prototype is refined, the next step is to conduct a feasibility study. This study evaluates the technical, financial, and operational aspects of the product. It helps the team understand the resources required for production and the potential market size. If the study indicates that the product is viable, the team can proceed to the next stage: developing a business plan.

4. The business plan outlines the company's strategy for launching and growing the product. It includes details about the target market, marketing channels, pricing strategy, and financial projections. The business plan is a crucial document for securing funding from investors or lenders. Once the business plan is approved, the team can move forward with the production and distribution of the product.

5. The final step in the process is to launch the product into the market. This involves setting up distribution channels, implementing marketing campaigns, and monitoring the product's performance. The team should be prepared to gather feedback from customers and make adjustments as needed. Continuous improvement is key to the long-term success of a new product.

(If an effective date is listed, the date must be specific and cannot be prior to date of filing or more than 90 days after filing.) Pursuant to 608.02(3)(c) (b)(v)

Note: If the date inserted in this block does not meet the applicable statutory filing requirements, this date will not be listed as the document's effective date on the Department of State's records.
