11. Explain the difference between a point estimate and a confidence interval. Point estimates are single values that represent the best estimate of a population parameter. Confidence intervals are ranges of values that are likely to contain the true population parameter. They provide a measure of the uncertainty associated with the point estimate.

13. The fact that the defendant's conduct with the property is substantially identical to the conduct of the defendant in the case of the plaintiff, that the defendant's conduct is the same as the plaintiff's conduct in the case of the plaintiff, and that the defendant's conduct is the same as the plaintiff's conduct in the case of the plaintiff, is not sufficient to establish that the defendant's conduct is the same as the plaintiff's conduct in the case of the plaintiff.
