The Energy-from-Waste Process

Hillsborough County's Resource Recovery Facility provides environmentally-sustainable waste disposal by incinerating waste instead of sending it to a landfill.

01

It starts with the trash from homes that is put curbside for disposal.

02

Trucks pick up the trash, which is delivered to the Resource Recovery Facility.

03

Waste is combusted at a high temperature, using recycled water to create steam, which turns turbines to generate renewable electricity.

04

The result: More than 500,000 tons of trash are diverted from the landfill and about 37 MW of power is generated. Enough to power 30,000 homes.

05

Electricity is used to power several major County treatment and operations facilities and sold externally to electric utility operations to power homes and businesses.
