11. The results of the regression analysis are presented in Table 1. The first column shows the dependent variable, the second column shows the independent variable, the third column shows the coefficient of the independent variable, the fourth column shows the t-statistic, the fifth column shows the p-value, the sixth column shows the adjusted R-squared, and the seventh column shows the F-statistic. The results show that the dependent variable is significantly positively related to the independent variable, and the relationship is statistically significant at the 1% level.

$\frac{1}{2} \left( \frac{1}{2} + \frac{1}{2} \right) = \frac{1}{2}$

1.  $\frac{1}{2} \frac{d}{dt} \int_{\mathbb{R}^n} |u|^2 dx = \int_{\mathbb{R}^n} u \Delta u dx = - \int_{\mathbb{R}^n} |\nabla u|^2 dx \leq 0$ .

[illegible]

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (CG) and the experimental group (EG). The CG was divided into two subgroups: the control group (CG) and the control group (CG). The EG was divided into two subgroups: the experimental group (EG) and the experimental group (EG). The CG was divided into two subgroups: the control group (CG) and the control group (CG). The EG was divided into two subgroups: the experimental group (EG) and the experimental group (EG).

$\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$
