Due to environmental conditions, many of these children don't even expect to live pass 25. Many of the really young; by the age of 7, probably will have been exposed to a criminal element that many of you would cringe in fear, just riding by in your car. Many of them live in what is considered a slum, and because of peer pressure, social disgrace, rules of the streets and a code that only a few live by. They find themselves making bad decision and caught up in the system. These youth now have been eliminated from achieving their true potential. Through social ridicule, these young people have quit trying, because society has shown them in many ways they do not care. But now, these young people are starting to influence the respected youthful population. With the way they **Live, Dress, Speak and Act**. Now society has a problem they do not know how to fix. Aegis is being designed to alleviate society of this accretion of problems. By allowing many of these young people the opportunity, to experience other chances, choices, and options, than their present way of perceiving their general outlook to their future that they are having. By placing these youth in a stabilized environment, and the same opportunities as many other youths, these youth will be able to achieve all of the same objectives as any other child. These children of the 75% that social groups deem unreachable are reachable. Aegis plans to grant these youth the opportunities that were never offered them. Through
