ARTICLE X. SJRWMD REQUIREMENTS

Section 1. Definitions. When used in these Restated Articles in this Section the following terms will have the following meanings:

(a) "SJRWMD" or "District" means and has meant throughout these Restated Articles, where previously used, the St. Johns River Water Management District, or its successor entity.

(b) "Surface Water Management System" means the Surface Water Management System or Storm Water Management System for the Property constructed pursuant to the SJRWMD permit which Surface Water Management System constitutes a part of the Common Areas. The Association owns or shall own the Common Area and owns the Surface Water Management System and hereby accepts responsibility for the operation and maintenance of the Surface Water Management System described in the SJRWMD application and the SJRWMD Permit.

(c) Surface Water Management System Easements. The Declarant hereby reserves unto Declarant and grants to the Association, subject to the terms and conditions of these Restated Articles, a non-exclusive easement burdening the areas of the Property designated on the Plat (and associated control structures), said areas being for the purpose of the Association effectively maintaining and operating the Surface Water Management System in accordance with the SJRWMD Permit. Declarant reserves, both for Declarant, and for the Owners collectively, and for the Association, the right to grant additional non-exclusive easements over, under, across and through the Common Area, provided that such additional easement grants do not interfere with the effective maintenance and operation of the Surface Water Management System.

(d) Operation and Maintenance of Surface Water Management System. It is the responsibility of the Association to operate and maintain the Surface Water Management System.

The Association shall effectively operate and maintain the Surface Water Management System in accordance with the SJRWMD Permit. This shall include the filing of monitoring reports on a quarterly basis during the first year, and semi-annually thereafter, for a period of three (3) years and until success criteria are met for two (2) consecutive monitoring intervals.

(e) Amendment. Notwithstanding Article XI of these Articles, or any other amendment provision, any amendment (including a termination) of these Articles that would directly and adversely affect the operation and maintenance of the Surface Water Management System in a material respect must have the prior approval of the SJRWMD. Any amendment proposed to these Restated Articles that would affect the Surface Water Management System, conservation areas, or water management portions of common areas shall be submitted to SJRWMD for review prior to finalization of the amendment. SJRWMD shall determine if the proposed amendment will require a modification of the environmental resource or Surface Water Management Permit. If a permit modification is necessary, the modification must be approved by SJRWMD prior to the amendment of these Restated Articles or its effectiveness.

(f) Disposition. The Association shall not dissolve or dispose of any Common Area or common open space or improvements therein except to an organization concerned with and designed for the continued maintenance in accordance with the requirements of the original development approval.

(g) Enforcement. SJRWMD shall have the right to enforce, by a proceeding at law or in equity, the provisions contained in these Articles that relate to the maintenance, operation, and repair of the surface water or storm water management system.

(h) Swale Maintenance. The Developer has constructed a drainage swale upon each lot for the purpose of managing and containing the flow of excess surface water, if any, found upon such lot from time to time. Each lot owner, including builders, shall be responsible for the maintenance, operation, and repair of the swales on the lot. Maintenance, operation, and repair shall mean the exercise of practices, such as mowing and erosion repair, which allow the swales to provide drainage, water storage, conveyance, or other storm water management capabilities as permitted by SJRWMD. Filling, excavating, constructing fences, or otherwise obstructing the surface water flow in the swales is prohibited. No alteration of the drainage swale shall be authorized and any damage to any drainage swale, whether caused by natural or human-induced phenomena, shall be repaired and the drainage swale returned to its former condition as soon as possible by the Owner(s) of the Lot(s) upon which the drainage swale is located.

(i) Alteration of Drainage Flow. No person shall alter the drainage flow of the surface water or storm water management system, including buffer areas or swales, without the prior written approval of SJRWMD.

Section 2. Lift Station. The Property and all of the Lots within the Property may be serviced by a waste water sewer Lift Station. The Lift Station includes a structure housing (wet well), pumps, piping, valves and auxiliary equipment for the collection of waste water sewage from the community's sanitary sewer collection system.

The Lift Station may not be dedicated to Indian River County; and, as such, the Association shall be responsible for its preservation and maintenance. On an annual basis, the Association shall contract with a private maintenance company to perform periodic inspections of the Lift Station and to provide a response in emergency situations, should the Lift Station fail to function or should the Lift Station be damaged. The Association shall also procure insurance coverage for the Lift Station to pay for loss or damage to the Lift Station equal to its full

replacement cost and satisfactory to the Indian River County Utilities Department. Also, on an annual basis, the Association shall submit evidence of such insurance to the Indian River County Utilities Department.

Section 3. Animal Waste. Animal Waste shall be disposed of in a manner consistent with the requirements of the animal waste management plan approved and permitted by SJRWMD, and such plan shall seek to minimize introduction of phosphorus into the Surface Water Management System. All Owners shall have the duty and obligation to comply with the requirements of such plan; the Association shall have the full power and authority to enforce the plan and all Owners' compliance with same, including but not limited to through the imposition of either or both legal and equitable proceedings.

Section 4. Association Powers Clarified. Notwithstanding any other term, condition, or provision in these Articles of Incorporation or By-Laws of the Association, the Association shall have and is hereby vested with the following powers, rights, duties, and responsibilities:

- (a) Establish rules and regulations.
- (b) Assess Members and enforce collection of said assessments.
- (c) File suit and be sued.
- (d) Contract for services (if the Association contemplates employing a maintenance company) to provide the services for operation and maintenance.
- (e) The Association shall exist in perpetuity; however, if the Association is dissolved, the property consisting of the Surface Water Management System shall be conveyed to an appropriate agency of local government, as determined by the SJRWMD. If it is not accepted, then the Surface Water Management System must be dedicated to a similar non-profit corporation, as determined and specified by the SJRWMD.
- (f) Operate and maintain the Surface Water Management System.
- (g) Any proposed amendment to the governing documents, which would affect the Surface Water Management System (including environmental conservation areas and the water management portions of the common areas) must be submitted to the District for a determination of whether the amendment necessitates a modification of the Surface Water Management Permit. If a modification is necessary, the District will so advise the permittee.
- (h) If wetland mitigation monitoring will be required and the operational entity will be responsible to carry out this obligation, the Association shall complete the task successfully, including meeting including all conditions associated with mitigation maintenance and monitoring.
- (i) The Surface Water Management Permit and its conditions shall be attached hereto as an exhibit. The Registered Agent for the Association shall maintain copies of all further permitting actions for the benefit of the Association.

Section 5. Monitoring and Maintenance. Monitoring and maintenance of the mitigation area, as described in SJRWMD Permit, shall be the responsibility of the Association.

The Association must successfully complete the mitigation and satisfy Permit conditions.

Section 6. Environmental Resource or Surface Water Management Permit Attached. The Environmental Resource or Surface Water Management Permit is made a part of these Articles. Copies of the Permit and any future permit actions of SJRWMD are and shall be maintained by the Registered Agent of the Association for the benefit of the Association.

ARTICLE XI. HOUSING FOR OLDER PERSONS

Section 1. Age of Residents: Services and Facilities. Subject to all local ordinances, as they may be amended from time to time, at least eighty (80%) percent of the occupied Residences, as the terms *Residence* or *Residences* are defined in the governing documents of the Harmony Reserve including but not limited to the Declaration, whether single family or villa townhomes, must be occupied by at least one (1) person fifty-five (55) years of age or older. No person under the age of eighteen (18) may be a permanent occupant of any Residence, except that persons under the age of eighteen (18) may be permitted to visit and temporarily reside for periods not to exceed thirty (30) days in total in any calendar year. Such temporary residency shall be governed by Rules and Regulations adopted by the Board of Directors. Notwithstanding anything to the contrary set forth in this Declaration, the restriction that no person under the age of eighteen (18) years may be a permanent occupant of any Residence shall be in perpetuity and shall not be subject to amendment. The provisions of this Article are intended specifically to be consistent with and are set forth in order to comply with the provisions of the federal Fair Housing Act and the Housing for Older Persons Act (collectively, the "Act") and exceptions therefrom provided by 42 U.S.C., Section 3607, regarding discrimination based on familial status, and may be amended at any time by a majority of the Board of Directors (without the joinder or vote of Owners) to reduce the fifty-five (55) years of age restriction if so permitted by the Act. Each Owner is hereby advised by the recording of this Declaration that up to twenty (20%) percent of the occupied Residences in Harmony Reserve may be occupied by persons who are under the age of fifty-five (55) for so long as such persons are eighteen (18) years of age or older, except that persons under the age of eighteen (18) may be permitted to visit and temporarily reside for periods not to exceed thirty (30) days in total in any calendar year.

Section 2. Sale or Lease. Owners shall be responsible for including the statement that the Residences within Harmony Reserve are intended for occupancy by persons fifty-five (55) years of age or older, as set forth above, in conspicuous type in any lease, purchase and sale agreement, transfer documents, or other occupancy agreement relating to such Owner's Residence, which agreements or contracts shall be in writing and signed by the tenant or purchaser. No Owner may transfer any interest in a Residence without the approval of Association as provided in Association's Rules and Regulations. Without limiting the foregoing, Association has the right to withhold approval of any transfer or change in occupancy of a Residence that will not result in occupancy of the Residence by at least one person fifty-five (55) years of age or older.

Section 3. Change of Occupancy. In the event of any proposed change in occupancy of any Residence as a result of transfer, sale, gift, lease, sublease, assignment, death, birth, marriage, separation, divorce, or otherwise, the Owner of such Residence shall immediately notify the Board of Directors in writing and provide to the Board of Directors the names and ages of all current and proposed occupants of the Residence and such other information the Board of Directors may reasonably require to verify the age of each occupant. No voluntary change in occupancy may occur without the prior approval of Association as provided in Association's Rules and Regulations.

Section 4. Maintaining Age Records. The Association shall be responsible for maintaining age records on all occupants of Residences. The Board of Directors shall publish and adhere to policies, procedures, and rules to monitor and maintain compliance with this Article and the Act, including policies regarding verification of compliance with the Act through surveys and affidavits. The Association shall develop procedures for determining the occupancy of each Residence. The Association may require occupants of Residences to produce (and, in such event, all Owners of Residences shall cause such data to be produced at the request of the Board of Directors) copies of birth certificates, driver's licenses, passports, immigration cards, military identifications, or other official documents containing birth date of comparable reliability.

Section 5. Enforcement of Provisions. The Association shall have the power and authority to enforce this Article in any legal manner available, as the Board of Directors deems appropriate, including, without limitation, taking action to evict or eject the occupants of any Residence which does not comply with the requirements and restrictions of this Article and with the Act. **EACH OWNER HEREBY APPOINTS THE ASSOCIATION AND ITS BOARD OF DIRECTORS AS THE ATTORNEY-IN-FACT FOR THE PURPOSE OF TAKING LEGAL ACTION TO DISPOSSESS, EVICT, EJECT, OR OTHERWISE REMOVE THE OCCUPANTS OF AND FROM SAID OWNER'S RESIDENCE, AS NECESSARY IN THE JUDGMENT OF THE BOARD OF DIRECTORS TO ENFORCE COMPLIANCE WITH THIS ARTICLE.** Each Owner shall fully and truthfully respond to any and all requests by the Association for information regarding the occupancy of any Residence, which in the judgment of the Board are reasonably necessary to monitor compliance with this Article and with the Act.

ARTICLE XII.

FERTILIZERS AND BEST PRACTICES WITHIN THE HARMONY RESERVE

Section 1. Overview. As a result of impairment to surface waters caused by excessive nutrients under the Florida Impaired Waters Rule or as a result of increasing levels of nitrogen and phosphorous in the surface and ground water within the aquifers or springs within the boundaries of St. Johns River Water Management District (the "District"), it has been determined that the use of fertilizers on lands within the District creates a particularly high risk to contributing to adverse effects on surface and ground water. Accordingly, the District finds that more restrictive measures than are otherwise required by the most recent edition of the *Florida Green Industries Best Management Practices for Protection of Water Resources in Florida, June 2002*, shall be mandatory for and on all Lots within Harmony Reserve.

Section 2. Definitions for this Article.

(a) "Application" or "Apply" means the actual physical deposit of Fertilizer to Turf or Landscape Plants.

(b) "Best Management Practices" means turf and landscape practices or combination of practices based on research, field-testing, and expert review, determined to be the most effective and practicable on-location means, including economic and technological considerations, for improving water quality, conserving water supplies, and protecting natural resources.

(c) "Certified Professional" means a person who possesses a certificate of completion in the Florida Green Industries Best Management Practices.

(d) "Fertilize," "Fertilizing," or "Fertilization" means the act of applying Fertilizer to Turf, specialized Turf, or Landscape Plant.

(e) "Fertilizer" means any substance or mixture of substances, except pesticide/fertilizer mixtures such as "weed and feed" products, that contains one or more recognized plant nutrients and promotes plant growth or controls soil acidity or alkalinity or provides other soil enrichment, or provides other corrective measures to the soil. The use of Phosphorus-Free Fertilizer and slow-release nitrogen fertilizer is required.

(f) "Slow Release," "Controlled Release," "Timed Release," "Slowly Available," or "Water Insoluble Nitrogen" means nitrogen in a form that delays its availability for plant uptake and use after application, or which extends its availability to the plant longer than a reference rapid or quick release product.

(g) "Turf," "Sod," or "Lawn" means a piece of grass-covered soil held together by the roots of the grass.

Section 3. Fertilizer Free Zones. Fertilizer shall not be applied within ten (10) feet of any pond, stream, water course, lake, canal, or wetland as such terms are defined by the Florida Department of Environmental Protection (Chapter 62-340, *Florida Administrative Code*) or from the top of a seawall. If more stringent or restrictive state or local government regulations apply, this provision does not relieve the requirement to adhere to the more stringent regulations. Newly planted Turf and Landscape Plants may be fertilized in this Zone only for the first sixty (60) day establishment period.

Section 4. Fertilizer Application. Fertilizer may be applied only by a Green Industry Landscape company or Certified Professional implementing the use of GI-BMPs (Green Industry Best Management Practices.) Application of fertilizer by individual homeowners is prohibited.

Section 5. Scheduling and Quantities. Fertilization scheduling and quantities shall not exceed the "low maintenance" recommendations of the University of Florida Cooperative IFAS Extension Service. The Landscaping Committee may grant a written exception for a period not to exceed ninety (90) days for specific applications to diseased or damaged plants, confirmed nutrient deficiencies, or other justifiable reasons.

Section 6. Landscape Maintenance Contracts.

(a) All lawn maintenance contracts must follow the University of Florida Institute for Food and Agricultural Sciences and Florida Department of Environmental Protection Green Industries Best Management Practices manual, and if needed, irrigation, fertilizer and pesticide applications must be at the low end of the maintenance recommendations contained in the most recent copy of the manual.

(b) All contractors must employ Green Industries Best Management Practices-certified supervisors and applicators of fertilizer.
