Date

Purpose of "Pro-Life Doc"

The primary purpose of "Pro-Life Doc" is to educate the public of the value of human life within the womb. Tools of modern obstetrics such as ultrasound, MRI and fetoscopy are used to reveal not only the life, but the personality of a baby within the womb. Surgical advances in fetal surgery such as Cardiac valvuloplasty, septoplasty, spina bifida corrective surgery and even intrauterine fetal blood transfusion prove that the Pre-Born are treated as patients, and if they are patients, they are persons with legal protection. Expert medical testimony is provided to legislative bodies to protect the lives of those that are unable to defend themselves.
