## ARTICLE TEN

### (Definitions of terms)

I INC extracted by direct measurement from the Cooperation model rule table. Cooperation is also measured by the sum of the products of the number of individuals in each class by the probability of finding an individual in that class. The probability of finding an individual in a particular class is calculated as the ratio of the number of individuals in that class to the total number of individuals in the population. The probability of finding an individual in a particular class is calculated as the ratio of the number of individuals in that class to the total number of individuals in the population.
