F. If amending or adding additional Articles, enter change(s) here:

(Attach additional sheets, if necessary). (Be specific)

1. The first step in the process of the scientific method is to make an observation or ask a question.

2. Next, a hypothesis is made, which is an educated guess or prediction about the outcome of the experiment.

3. The hypothesis is then tested by conducting an experiment, which involves manipulating one variable while keeping all other variables constant.

4. The results of the experiment are then analyzed, and the data is compared to the hypothesis to see if it is supported or refuted.

5. If the hypothesis is supported, it becomes a theory. If it is refuted, a new hypothesis is made and the process starts over.

6. The scientific method is a systematic approach to investigating the natural world, and it is used by scientists in all fields of study.

7. It is important to follow the scientific method to ensure that the results of an experiment are valid and reliable.

8. The scientific method is a key part of the scientific process, and it is used to advance our understanding of the world around us.

9. By following the scientific method, scientists can make discoveries and develop new technologies that improve our lives.

10. The scientific method is a powerful tool for understanding the natural world, and it is a key part of the scientific process.

F. If an amendment provides for an exchange, reclassification, or cancellation of issued shares, provisions for implementing the amendment if not contained in the amendment itself:

(if not applicable, indicate N/A)

1. The first step in the process of the investigation is to identify the problem or issue that needs to be addressed. This involves gathering information about the situation and determining the scope of the investigation.

2. Once the problem is identified, the next step is to develop a plan of action. This plan should outline the objectives of the investigation, the methods to be used, and the timeline for completion.

3. The third step is to collect data. This involves gathering information from various sources, including interviews, observations, and documents. The data should be organized and analyzed to identify patterns and trends.

4. The fourth step is to interpret the data. This involves drawing conclusions from the data and identifying the causes of the problem. It is important to consider the limitations of the data and the potential for bias.

5. The final step is to report the findings. This involves writing a report that summarizes the results of the investigation and provides recommendations for action. The report should be clear, concise, and easy to understand.

The date of each amendment(s) adoption: 12/14/2015, if other than the date this document was signed.

Effective date if applicable: 12/14/2015
(no more than 90 days after amendment file date)

Note: If the date inserted in this block does not meet the applicable statutory filing requirements, this date will not be listed as the document's effective date on the Department of State's records.
