19. ADDITIONAL COMMENTS, RECOMMENDATIONS AND CONCLUSIONS:

14. (a) Consider a body that has a constant speed v with the flow, is subjected to a drag force F_D and equally to the buoyancy, indicated as F_B . The body is displaced a further length Δx from the initial position along the stream, equal to a displacement Δx upstream, and that the separation distance Δx is the same as the length of the body. The buoyancy force F_B is proportional to the volume of the body and the drag force F_D is proportional to the square of the speed v . The body is displaced a further length Δx upstream.
