11. The *Journal of the American Statistical Association* published a study of the relationship between the number of cigarettes smoked per day and the number of years of education. The study found that the correlation coefficient was -0.15 . The study also found that the average number of cigarettes smoked per day was 15 and the average number of years of education was 12 . The study concluded that there was a weak negative correlation between the number of cigarettes smoked per day and the number of years of education.
