14. The theorem states that the submatrix A_{sub} of A has the same column rank, row rank, and rank as A . For this, the proof states that the column rank of A_{sub} is at least the column rank of A , and the row rank of A_{sub} is at least the row rank of A . Then, it is shown that the column rank of A_{sub} is at most the column rank of A , and the row rank of A_{sub} is at most the row rank of A . Finally, it is concluded that the column rank of A_{sub} is equal to the column rank of A , and the row rank of A_{sub} is equal to the row rank of A . Therefore, the rank of A_{sub} is equal to the rank of A .
