As the number of nodes in the network increases, the number of nodes that are not connected to the network increases. This is because the number of nodes that are not connected to the network is proportional to the number of nodes in the network. As the number of nodes in the network increases, the number of nodes that are not connected to the network increases. This is because the number of nodes that are not connected to the network is proportional to the number of nodes in the network.
