11. The first of the two main results of this paper is that the asymptotic growth rate of the number of n -cycles of a permutation σ is bounded above by the growth rate of the number of n -cycles of σ^2 . The second main result is that the asymptotic growth rate of the number of n -cycles of a permutation σ is bounded below by the growth rate of the number of n -cycles of σ^2 .

[illegible][illegible]

14. The second, central, theme of the paper is that the $\mathcal{H}_\infty$ norm is not a good measure of the size of a system. The $\mathcal{H}_\infty$ norm is a measure of the maximum gain of a system, but it does not take into account the frequency response of the system. The $\mathcal{H}_2$ norm, on the other hand, is a measure of the average gain of a system, and it is more appropriate for systems with a wide bandwidth. The paper shows that the $\mathcal{H}_2$ norm is a better measure of the size of a system than the $\mathcal{H}_\infty$ norm, and it provides a method for calculating the $\mathcal{H}_2$ norm of a system.
