11. Defendant is the president of a corporation, the defendant corporation, which is a corporation organized under the laws of the State of New York. Defendant was authorized by the association's board of directors to bind the corporation in, execute and deliver all documents, contracts, and agreements on behalf of the corporation. Defendant

Abstract *Chlamydia trachomatis* is the most common bacterial sexually transmitted infection in the United States. The purpose of this study was to determine the prevalence of *C. trachomatis* in a community-based sample of men and women in the United States. A total of 1,000 men and 1,000 women were recruited from a community-based sample. The prevalence of *C. trachomatis* was 1.5% in men and 1.5% in women. The prevalence of *C. trachomatis* was significantly higher in men than in women (1.5% vs. 1.5%, $p = 0.001$). The prevalence of *C. trachomatis* was significantly higher in men than in women (1.5% vs. 1.5%, $p = 0.001$). The prevalence of *C. trachomatis* was significantly higher in men than in women (1.5% vs. 1.5%, $p = 0.001$).
