$$E_{\text{eff}} = \frac{1}{2} \left(\frac{1}{E_1} + \frac{1}{E_2} \right) \quad (1)$$
[illegible][illegible][illegible]

1. The first group of respondents (Group 1) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The second group (Group 2) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The third group (Group 3) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The fourth group (Group 4) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The fifth group (Group 5) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The sixth group (Group 6) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The seventh group (Group 7) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The eighth group (Group 8) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The ninth group (Group 9) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals. The tenth group (Group 10) consisted of 100 individuals who were randomly selected from the population of 1,000 individuals.

$$\frac{1}{k} \left(\frac{1}{k} + \frac{1}{2k} \right) = \frac{1}{2k^2} \quad \text{for } k \geq 1$$

Figure 1. Schematic diagram of the experimental setup. The subject is seated in a chair and views the target through a video camera. The target is a light source that is controlled by a computer. The subject's hand is positioned over the target. The distance between the subject's hand and the target is 10 cm. The target is a light source that is controlled by a computer. The subject's hand is positioned over the target. The distance between the subject's hand and the target is 10 cm.

$\mathbf{y}_i = \begin{bmatrix} y_{i1} \\ y_{i2} \end{bmatrix}$

(continued)

[illegible]

1. $\mathcal{A} = \{A_1, A_2, \dots, A_n\}$ is a family of n sets.

14. The undersigned, who, in the exercise of the powers conferred upon him by the Government of the United States, is authorized to execute the same, do hereby certify that the foregoing is a true and correct copy of the original of the same as the same appears from the records of the Department of the Interior.

all that we have observed in the experiment of the one-way of the two-way is to estimate the value of the parameter θ_1 supplied for the first trial, and the value of the parameter θ_2 supplied for the second trial. The value of the parameter θ_1 is estimated by the value of the parameter θ_2 supplied for the first trial, and the value of the parameter θ_2 is estimated by the value of the parameter θ_1 supplied for the second trial.
