

Detailed description of Figure 1: The graph plots 'Percentage of total catch' on the y-axis (0-100) against 'Percentage of total effort' on the x-axis (0-100). Several lines represent different fish species. Yellow perch shows a very steep initial rise, indicating a high catch rate for a small effort. Rock bass and White perch also show high catch rates for low effort. Striped bass shows a more gradual increase. Other species like Smallmouth bass and Rock bass are also represented with lines showing their respective catch-effort relationships.
