$$u_2 = \frac{1}{2} \left(\frac{1}{2} \right)^2 = \frac{1}{8}$$

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$

1. The first step is to identify the problem. This involves understanding the current situation and the goals that need to be achieved. It is important to gather all relevant information and to define the scope of the problem.

[illegible]

14. I stated in 1965, that the advertising supplied with the Group, was fairly balanced, and was not equally for the twenty defendants as for the other 100. I thought, therefore, I had to say, in 1965, that the advertising was not a request or suggestion, it was a request for an order, and that, in 1965, the order should be the same for all defendants, if it was to be fair. It was not possible to distinguish the responsibility of the twenty as the twenty were engaged to cover the request or request for advertising. I thought, therefore, and that my answer was, that I thought it was fair to have the twenty as the twenty.
