The Florida Division of Forestry consists of more than 1250 dedicated employees with the mission to protect and **manage the forest resources** of Florida, ensuring that they are available for future generations.

Wildfire prevention and suppression are key components in our efforts to protect homeowners from the threat of damage in a natural, fire-dependent environment. We are dedicated to **training** individuals to meet these goals.

In addition to managing over one million acres of **State Forests** for multiple public uses including timber, recreation and wildlife habitat, we also provide **services to landowners** throughout the state with technical information and grant programs.

The Division's forestry programs are implemented by its **Field Operations** staff within 15 field units across the state. Field personnel and equipment provide a more responsive and comprehensive approach to land management and wildfire control statewide.
