Welcome to Avail Clinical Research

Avail Clinical Research is a renowned and experienced clinical research site in Florida conducting Phase I-IV clinical trials.

Clinical Research Studies in Central Florida

Avail Clinical Research is a renowned and experienced clinical research site conducting **Phase I-IV clinical trials in Florida**. These clinical trials test investigational treatments and therapies being developed by pharmaceutical and biotech companies. Clinical drug trials are designed to evaluate the safety and efficacy of innovative new drugs and treatments in humans.

We conduct clinical studies for a variety of conditions such as **diabetes**, **hepatitis c**, **high cholesterol**, and more, and are looking for volunteers to participate.

Learn about Clinical Study Participation

We are dedicated to educating and informing you about clinical research so that you can **make an informed decision about clinical study participation**. Please browse our website to learn more about the clinical trials that we conduct, the physicians involved and details on our best-in-class facilities here in Florida.

If you are interested in participating, click Get Started at the top (or fill out the quick form to the right) and tell us a little more about yourself so we can assist in placing you into the right trial or study group. Or, give us a call at (386) 785-2404 to speak with one of our clinical trial experts who will guide you through the process of determining which trial is right for you.

Submit form to get started

LEARN MORE

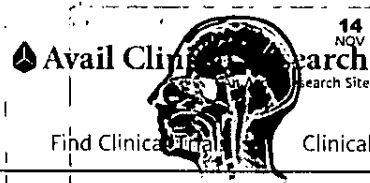

Benefits of study participation:

- Receive all trial related treatments & medical care at **no cost to you**
- **No health insurance** required to participate
- May be **compensated for time and travel** while participating
- Help advance the knowledge of your condition, thereby assisting in **finding a treatment or cure**

Are you a Pharmaceutical Sponsor or CRO?

Clinical Study Participation

Deciding to participate in a clinical study is a choice that must be made after educating oneself about clinical studies and determining if you are a candidate for research.

The most important aspect of clinical research studies is the health and well-being of our patients. It is our belief that an informed patient is a happier and healthier patient. That's why our focus is on keeping you informed, answering your general questions about clinical research, and answering specific questions about our site and our trials.

Participating in a clinical study is an important decision and should be thought through carefully. Finding the right trial often brings up many questions, which is why we have devised a list of topics to help resolve these concerns and further educate participants.

Common Questions:

[What are Clinical Research Trials?](#)

[Why Participate in a Clinical Study?](#)

[What's the difference between a Clinical Trial and Treatment?](#)

[How are Drugs Tested?](#)
