PART III

ENTER NAME, LOGO, DESIGN AND/OR SLOGAN BEING REGISTERED:

1. Enter the name, a brief description of the logo or design, and/or the slogan you are registering. The description of the logo and/or design must be 25 words or less. List the exact name, slogan, and/or description of the logo/design here: (NOTE: The name, logo, design and/or slogan listed in this section must match the exact name, logo, design and/or slogan listed on your specimens or examples.)

"Melbourne Terrace Rehabilitation Center" - Navy blue and Gold Logo with triangular shaped design in upper left corner with a pineap
logo in the middle of the picture. The words Melbourne Terrace are larger in navy blue font with gold outline. A line is below the wor
"Terrace" with "Rehabilitation Center" written below in all caps.

Provide the English translation of any and all terms listed #1 above, when applicable: n/a

2. DISCLAIMER STATEMENT (if applicable):

Your mark may include a word or design that is commonly used by others. Commonly used terms or designs must be disclaimed. When you disclaim a specific term or design, you are acknowledging this term is commonly used by others and that you do not claim the exclusive right to use the disclaimed term or design. All geographical terms and representations of cities, states or countries must be disclaimed (i.e., Miami, Orlando, Florida, the design of the state of Florida, the design of the United States of America, etc.). Corporate suffixes and terms readily associated with the specific product(s) and/or(s) service being provided must also be disclaimed.

Enter all terms listed in #1 above which require a disclaimer in the space provided below:

NO CLAIM IS MADE TO THE EXCLUSIVE RIGHT TO USE THE TERM(S)" MELBOURNE

" APART FROM THE MARK AS SHOWN.

3. ATTACH OR INCLUDE THREE SPECIMENS OR EXAMPLES OF THE TRADEMARK OR SERVICE MARK BEING REGISTERED

Chapter 495, F.S., requires you to submit three specimens (samples or examples) of the mark in use. You must submit three specimens FOR EACH CLASS listed in Part 1 #2(d). The name, logo, design and/or slogan on the specimens must be identical to the name, logo, design and/or slogan being registered. You may provide three identical specimens or three different specimens. For each service mark class (classes 35-45), you may provide three newspaper advertisements, business cards, brochures, flyers, or any combination thereof. For each trademark class (classes 1-34), you may provide three tags, labels, boxes, etc., or any combination thereof. Photographs of bulky specimens are acceptable if the mark being registered and the good(s) or product(s) are clearly legible.

SIGNATURE OF APPLICANT/OWNER AND NOTARIZATION:

I, Deborah P. Kennedy, being sworn, depose and say that I am the owner and the applicant herein or that I am authorized to sign on behalf of the owner and applicant herein, and to the best of my knowledge no other person except a related company has registered this mark in this state or has the right to use such mark in Florida either in the identical form thereof or in such near resemblance as to be likely when applied to the goods or services of such other person to cause confusion, to cause mistake or to deceive. I make this affidavit and verification on my the applicant's behalf. I further acknowledge that I have read the application and know the contents thereof and that the facts stated herein are true and correct.

REHABILITATION PROGRAMS

Melbourne Terrace provides skilled rehabilitative services for those patients who require skilled needs in order to return to their prior level of function. We involve an interdisciplinary approach to treatment involving physical therapy, occupational therapy and speech therapy as described below.

Physical Therapy

Physical therapy can foster each patient's independence and enable functional mobility skills following orthopedic or neurological conditions or injuries. Innovative techniques are used to restore maximum function and minimize pain. Improving range of motion, strength, coordination and muscle control will bring you closer to your functional goals.

Occupational Therapy

Occupational therapy focuses on achieving greater independence in the activities of daily living such as bathing, dressing and eating following an illness or injury. To promote maximum function and mobility, our therapists use rehabilitation techniques and train residents with the use of specialized equipment.

Speech Therapy

Speech-language therapy helps patients improve their communication skills in speaking, problem solving, reading, writing and verbal expressions. Therapist also provide evaluation of treatment for a variety of swallowing disorders.

Aquatic Therapy

Inpatient and Outpatient

*Gravity got you down?
Then let the buoyant effects of water lift you up.*

If you find that weight bearing on land is becoming too difficult due to recent surgery, pain, weakness, loss of balance or a neurological condition - try adding a little water to your life.

Patients with a variety of conditions can take advantage of aquatic benefits

- ♣ Aquatic therapy with transition to land-based exercises
- ♣ Arthritis and joint pain management
- ♣ Cardiovascular training
- ♣ Musculoskeletal disorders
- ♣ Swelling and edema
- ♣ Controlling back pain with lumbar stabilization
- ♣ Foot, ankle, knee or hip pain rehabilitation
- ♣ Gait analysis
- ♣ Weight bearing restrictions
- ♣ Spinal cord injuries
- ♣ Stroke and brain injuries
- ♣ Balance and coordination training

Aquatic Therapy

Inpatient and Outpatient

The Aquatic Therapy Difference

Seven therapeutic differences of one-on-one aquatic therapy to help jump-start your wellness on land

- ♣ Hydrowork[™] underwater treadmill - is a unique walking machine to graduate you to move with more freedom and comfort on land.
- ♣ Heated water temperatures.
- ♣ Buoyancy - can eliminate up to 90% of body weight and will allow easier motion by decreasing stress on muscles, joints, and bones.
- ♣ Resistance - with multi-directional water flow for a deep penetrating massage.
- ♣ Hydrostatic Pressure - gentle pressure acts to circulate blood from the legs to the heart and leads to reduced swelling in the ankles and feet allowing joints to move more freely.
- ♣ Integrated Lift System with Safety Harness

Our therapists are certified by the Aquatic Therapy & Rehab Institute and trained to improve walking patterns.

Among the compelling reasons why you'll want to sign up for an evaluation is one reason that shines even brighter than the rest - your personal benefits and a therapist coaching you to a better quality of life on land

Effective Balance Rehabilitation

(Inpatient and Outpatient)

Are you aware that falls are preventable?

With effective balance rehabilitation, you don't have to be a statistic. Your safety is our concern and we have the newest technology and latest techniques to keep you on your feet. Our team of experienced therapists will evaluate you and determine the cause of imbalance. Your custom made therapeutic balance program will:

- Improve your strength and stamina
- Help rebuild a safer, stronger and more fluid gait
- Restore your maximum reflexes and responsiveness to obstacles
- Learn simple changes to increase your home safety awareness
- Teach you how to get up after a fall
- Increase your vital skills of balance
- Boost your confidence as you decrease your fall risk
- Review medication side effects that contradict your balance
- Advise on home safety programs

The good news is that you can learn better balance and reduce your risk of falling. Together we can make a tremendous difference in restoring your balance and in the way you go about enjoying life. Research shows that seniors who are more active are less likely to fall, because they are constantly improving their strength and balance. This is why health care professionals recommend starting a balance therapy program. All it takes is some time and skilled attention to put you on a path of stability and right your way to a safer future.

Balance Rehabilitation

Eight Top Reasons to Pick Up Your Balance

Among older adults (those 65 or older), falls are the leading cause of injury death.

87% percent of all fractures in the elderly are due to falls.

Of those who fall, up to 30% suffer moderate to severe injuries that increase their risk of early death.

Older adults are hospitalized for fall-related injuries five times more often than they are for injuries from any other cause.

40% of all nursing home admissions from fall injuries do not return to independent living.

On average, the hospitalization cost for a fall injury ranges from \$17,500 to \$20,000.

One in three adults age 65 and older falls each year.

The costs of fall injuries rapidly increase with age.

LSVT

BIG & LOUD

Therapy Program

Some of the most debilitating conditions can be neurological diseases like Parkinson's. Those diseases rob voice and movement. Their effects leave people whispering and tremors and muscle stiffness rule the body.

There is hope. Through a speech therapy program called Lee Silverman Voice Treatment (LSVT), patients can be helped. The evidence-based program called LSVT LOUD and BIG empowers function and movement.

The BIG program, offered by physical (PT) and occupational therapists (OT), comes from 20 years of research, which shows patients can improve their balance, core flexibility, and faster walking with bigger steps.

Without help, neurological disease dictates a patient's walk, posture, and muscles. Within a short time, people begin to stoop, trip and fall and range of motion becomes limited. What's more, our voice is affected by limits in volume – making it difficult to be heard.

(continued on other side)

321-725-3990

251 Florida Avenue, Melbourne, FL 32901

www.MelbourneTerraceRehab.com

(continued from other side)

Patients can overcome. The BIG training program teaches the amount of effort required to produce normal movements in everyday activities. Through a systematic retraining of sensory, muscle and cognitive abilities, people keep their movement alive.

The LOUD program, offered by a speech language pathologist, is an effective treatment for voice-limited individuals with neurological conditions. Essentially, therapy teaches a new normal to those stripped of their natural speaking voice. Through repetition, patients can self-correct a whisper into an audible sound.

If you or your loved one is being affected by the marks of a neurological disease, consider BIG and LOUD therapy programs offered through the PT, OT, and Speech departments.

Call your doctor for a referral, if you think you or a family member may benefit. Or ask our director of rehabilitation about how our BIG and LOUD program improves quality of life.

Rehabilitation for Patients with Cardiac Conditions (Inpatient and Outpatient)

*Nine Ways to Jump-Start Your Heart and
Get You Back to the Activities You Love*

Are you aware of the benefits of cardiac rehab for your diagnosed heart condition? Let's think about the value you can add to your life through the superb cardiac benefits below:

- Physician prescribed exercise directed by specially trained therapists
- Monitored and supervised environment for safe progressive exercise
- Nutritional counseling for weight loss and improved dietary changes
- Blood pressure management techniques to enhance your health
- Emotional assessment and support to empower your success
- Stress management education to overcome obstacles
- Personal support and education about better lifestyle changes
- Energy conservation and work simplification techniques to help resume your activities
- Respiratory therapy intervention to power-up your cardio-pulmonary strength

321-725-3990

233 Florida Avenue, Melbourne, FL 32901

www.MelbourneTerraceRehab.com

Cardiac Rehabilitation

Cardiac Rehabilitation begins with a qualified team evaluation that is customized for your personal needs, abilities and interests. Our team of physical, occupational and respiratory therapists has your heart in mind and wants you to resume those activities that you love. They have the experience, emergency training and education to watch for your body's response and plan for your success.

*Who can benefit from
this program?*

Naturally, this program will benefit you not just in the near future, but even more over time. We offer a medically directed program to help you recover from your type of cardiac event or condition, such as the following:

- Myocardial infarction (heart attack)
- Coronary artery bypass graft surgery (CABG)
- Current stable angina pectoris
- Heart valve repair or replacement
- Peripheral arterial disease
- Heart failure and those with ventricular assist devices
- Coronary artery disease
- Patients with diabetes
- Percutaneous transluminal coronary angioplasty or coronary stenting

The goal of our cardiac rehabilitation program is to optimize the quality and quantity of your life. Together we can empower your overall heart health.

Lymphedema Therapy Services

(Inpatient and Outpatient)

What is Lymphedema?

Lymphedema is an abnormal buildup of fluid that causes swelling, most often in the arms and legs. The condition develops when lymph vessels or lymph nodes are missing, impaired, damaged or removed.

What can cause Lymphedema?

The condition may occur following some surgeries, trauma, disease or radiation therapy, which results in damage to the lymph system. Occasionally it is due to congenital absence or malformation of the lymphatic system. Conditions that may result in lymphedema include:

- Cancer/cancer surgery, including lymph node removal
- Cardiac bypass surgery with vein graft harvest
- Venous insufficiency
- Deep vein thrombosis
- Obesity

2500 West Avenue
Melbourne, FL 32901

www.MelbourneTerraceRehab.com

Lymphedema Therapy Services

Is there a cure?

Presently, there is no cure for lymphedema. Effective management is possible through clinical treatment, education and individual efforts at home.

How can Therapy help?

We have a specially designed program to help patients manage lymphedema. It's called Complete Decongestive Therapy, or (CDT). This is a noninvasive treatment program consisting of four parts.

I. Manual Lymphatic Drainage (MLD)

This is a "hands on" manipulation of both the body tissue with lymphedema and adjacent selected areas. The therapist uses gentle pressure to empty and decompress obstructed lymph vessels. Such therapy allows lymph fluid to move around obstructed areas to aid in decreasing the size of limb.

II. Compression Bandaging

Once the MLD treatment is completed, the area is wrapped with layers of compression bandages. This helps the affected area maintain its reduced size.

III. Exercise

With the bandages in place, the patient will exercise to strengthen the muscles and improve lymph and circulatory system function. Active muscles enhance the process of pumping proteins, cells and water away from areas affected by lymphedema. The compression bandages provide support to the muscle's "pump system", prompting the absorption of excess lymphatic fluid.

IV. Skin Care and Education

Patients with lymphedema are at high risk for infection, so proper skin care and nutrition is critical to success. That's why the CDT treatment includes individualized education sessions. Patients become proficient in CDT techniques: wrapping, exercises and skin care to continue after completion of treatment.

Our Lymphedema Treatment Team consists of licensed Physical Therapists and Occupational Therapists who are certified in Complete Decongestive Therapy (CDT).

Transportation available for Outpatient Therapy

Rehabilitation for Patients with Pulmonary Conditions (Inpatient and Outpatient)

*Can't walk to the mailbox without
gasping for air?*

If this is you or someone you love, let's go after the myth that "no one can help this." There is effective therapy that can improve shortness of breath associated with lung disease. Our inpatient and outpatient pulmonary therapy helps control, reduce and alleviate the symptoms of any chronic respiratory disease. We help by providing a specialized health care team that works with many experts to achieve the highest possible level of independent living. Patients should expect to learn work simplification strategies and use energy conservation techniques that are proven to increase the quality of life by reducing their overall health care needs and costs.

Who would benefit from this program?

Patients with:

COPD	Pulmonary Fibrosis
Emphysema	Restrictive lung disease
Chronic Bronchitis	Interstitial lung disease
Pulmonary Hypertension	Neuromuscular disease

321-725-3990

230 Florida Ave East, Melbourne, FL 32901

www.MelbourneTerraceRehab.com

Rehabilitation for Patients with Pulmonary Conditions

What are common symptoms of chronic lung disease?

Shortness of Breath Fatigue Wheezing
Chronic or frequent cough Increased mucus production
Chest tightness Decreased Endurance
Difficulty taking a deep breath
Activities that are limited due to shortness of breath
Inability to do things you once loved to do

The Proper care of

A thorough Evaluation is given by a number of specialists geared to the patient's needs and from these factors that form a person's ability to lead a good quality of life.

Physical Therapy will employ breathing techniques coupled with exercises that are designed to achieve a patient's personal goals and habits, such as fishing, hiking, and walking.

Occupational Therapy will focus on strategies of energy conservation and work simplification techniques by teaching breathing modifications with upper body coordination.

Speech Therapy will improve talking, reading and writing impairments along with increasing problem solving abilities. Exercises that improve swallowing functions will be given to those in need.

Respiratory Therapy will administer coughing and peak flow monitoring and effectively address any pulmonary equipment changes. They teach and ensure that the required breathing techniques will enable a better quality of life.

What to expect?

A professional therapeutic team will administer one hour sessions, 2-3 times per week.

Wear comfortable and loose fitting clothing along with good support, exercise shoes.

In addition to the above noted therapies, nutritional counseling is given to improve lung and breathing functions.

A thorough nursing review will address medication optimization.

The input from psychosocial services may initiate coping strategies and give reference to any additional and needed services. Also, opportunities for support group

Rehabilitation for Patients with **Urinary Incontinence** (Inpatient and Outpatient)

If you experience too many and too frequent trips to the bathroom, it's now time to take charge of your life.

Yes, there's help for you with the latest advantages of technology and specially trained therapists. Are you aware that there are many types of overactive bladder symptoms? In general, it refers to the leakage of urine at inappropriate times, such as when you cough, laugh or sneeze. Fortunately, therapy can greatly help.

It's about better bladder functioning with therapy to strengthen pelvic-core muscles

Our personalized and computerized intervention helps to power-up the right muscles and give you six benefits.

- Techniques to help you successfully work the correct muscles and sequence them appropriately
- Revolutionary core exercises to effectively strengthen the pelvic muscles
- Training to stretch and strengthen other important muscles
- New ways to decrease urinary urge and frequency
- Biofeedback computer that shows you how your muscles are working
- Electrical stimulation to gently guide and coax muscle strengthening

321-725-3990

231 E. Florida Ave., Melbourne, FL 32901

www.MelbourneTerraceRehab.com

Urinary Incontinence

*It's about improving your life
 in so many ways*

You will be given advice on lifestyle, nutrition and diet changes that make a real difference

Increased confidence through physical therapy intervention

Reduced medication use and costs

Daily cost savings with less usage of pads and panty liners

Added life enjoyment with more travel and outings with friends and family

Therapy can give back speed of mobility and ease of transport to the bathroom

We've listened to our patients who live with urinary incontinence. Everything you couldn't easily ask can be answered by our highly trained physical therapist. She will personalize a program for any adult (male or female) with overactive bladder symptoms and help patients take back control of their life.

With all the quality of life benefits awaiting you, start your individualized program now. You don't have to put up with urinary incontinence. Experience a better life with newfound control.
